

The Mini-x

Mini Screen Printing Machine with Big Ideas.

Print Bulky Items

Make no mistake! The Mini-x is no ordinary Screen Printing Machine - it's a screen printing machine with big differences.

Most table-top screen printing machines available these days are usually limited to printing thin material only and with very limited features. However, the Mini-x offers you're a lot more for a lot less - please read on!

Image shown with optional extended board

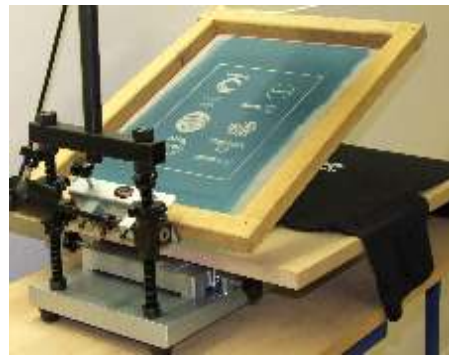

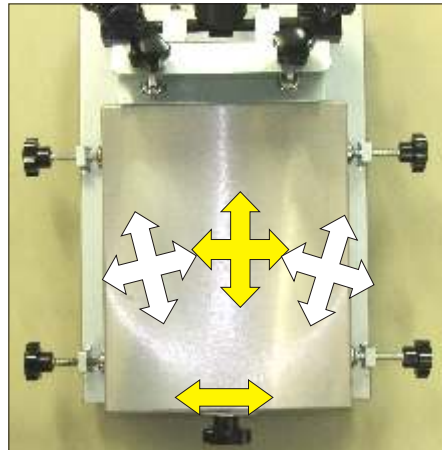

Image shows 24" x 19" Screen

Screen Printer with built-in exposure light for making your own screens.

Hi quality bearings for easy screen lift

Micro adjustments. Print Bed can move back and forth as well as sideways and angled.

Notes:-

- 1) Screens larger than 9"x9" will required to be propped up as they will be too heavy for the counter weight to work with.
- 2) You will require thick sponge and safety glass when making screens (not supplied). These are easily available from a local upholstery and glazing company.
- 3) Exposure Light gets very hot and must be kept away from children and the public. Close continuous supervision required when operating exposure light at all times. Never leave unattended.
